Construction & Demolition Landfill Customers:

The City of York personnel have noticed items of nonconformance in the Construction and Demolition area of the landfill, as described in Nebraska Department of Environment and Energy Title 132 – Integrated Solid Waste Management Regulations. These items include but are not limited to: Seed Corn Grain, used chemical containers, appliance and general refuse. Only Construction and Demolition materials are to be disposed of in the area. The City could incur a \$10,000 per day fine from the Nebraska Department of Environment and Energy, thus the reason for creating an excess charge of \$1,000 per nonconformance item in the Construction and Demolition area.

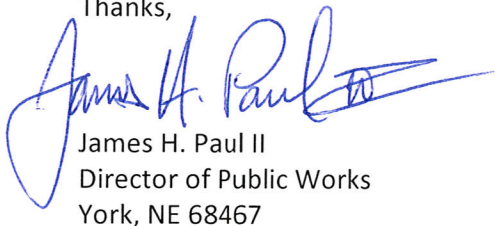

Nebraska Department of Environment and Energy definition:

021 "Construction and demolition waste" shall mean waste which results from land clearing, the demolition of buildings, roads or other structures including, but not limited to, fill materials, wood (including painted and treated wood), land clearing debris other than yard waste, wall coverings (including wall paper, paneling and tile), drywall, plaster, non-asbestos insulation, roofing shingles and other roof coverings, plumbing fixtures, glass, plastic, carpeting, electrical wiring, pipe and metals. Such waste shall also include the above listed types of waste that result from construction projects. Construction and demolition waste shall not include friable asbestos waste, special industrial solid waste, corrugated cardboard, appliances, tires, drums and fuel tanks.

Customers disposing of any nonconforming items in the Construction and Demolition area of the landfill, will receive an excess charge of \$1,000.00 per item found to be in nonconformance.

If you have questions, please contact James Paul at: jpaul@cityofyork.net or (402) 363-2604.

Thanks,

James H. Paul II
