

Street Reconstruction Project Closures for 2023 (Updated 5/19/2023)

In planning for the upcoming street closures, below you will find approximate dates for the start of closures for each street construction area. There is an approximate three-week closure timeframe for each construction area. The roads in each area will be completely closed to traffic. Residents will have to utilize alternate parking along side streets outside of the construction areas and walk to their homes. Mailboxes will be removed from the public right of way during construction activities. Cluster-type mailboxes will be made available in the areas of construction, due to the public right of way being utilized for construction activities. Mailboxes will be relocated to original locations after construction is completed in each area. Scheduled work hours and dates of construction are subject to change and working hours may be outside of normal hours of the day, due to weather conditions.

Area	Start of Closure
North Nebraska Avenue from 19 th Street to A Street	5/24/2023

Please stay up to date on changing construction dates or times that will be posted in the following areas:
