

## Street Reconstruction Project Closures for 2023 (Updated 9/11/2023)

In planning for the upcoming street closures, below you will find approximate dates for the start of closures for each street construction area. There is an approximate three-week closure timeframe for each construction area. The roads in each area will be completely closed to traffic. Residents will have to utilize alternate parking along side streets outside of the construction areas and walk to their homes. Mailboxes may be moved from the public right of way during construction activities and placed along a side street for use, contractor will ensure to notify homeowners where mailbox is temporarily relocated. Scheduled work hours and dates of construction are subject to change and working hours may be outside of normal hours of the day, due to weather conditions. Grass seeding and sprinkler relocation will occur after concrete is placed for street at no cost. If sprinkler heads can be marked, that would be great, repairs will be made. Sidewalks and driveway approaches that are removed will also be replaced at no cost.

Area	Approximate Start of Closure
Blackburn Avenue between 14 <sup>th</sup> street and Duke Drive. Will be Closed on Monday 9/18/2023. Street construction will take place during this time. Street construction is expected to last 3 weeks. Residents with driveways adjoining Blackburn Avenue will have to park on side streets outside of construction area.	9/18/2023

**Red** is Closure Area, **Green** is where Kopcho trash receptacles are to be place in the right of way along the side street, mailboxes will remain near homes on property in the area.

Please stay up to date on changing construction dates or times that will be posted in the following areas:
